Informed Consent

I here by request and consent to the performance of acupuncture treatments and other procedures within the scope of the practice of acupuncture on me (or on the patient names below, for whom I am legally responsible) by the acupuncturist named above and/or other licensed acupuncturists who now or in the future treat me while employed by, working or associated with or serving as back-up for the acupuncturist named above, including those working at the clinic or office listed above or any other office or clinic, whether signatories to this form or not.

I understand that methods of treatment may include but are not limited to, acupuncture, moxibustion, cupping, electrical stimulation, Tui-Na (Oriental Massage), Oriental herbal medicine, and nutritional counseling. I understand that the herbs may need to be prepared and the teas consumed according to the instructions provided orally and in writing. The herbs may be an unpleasant smell or taste. I will immediately notify a member of the clinical staff of any unanticipated or unpleasant effects associated with the consumption of the herbs.

I have been informed that acupuncture is a generally safe method of treatment, but that it may have some side effects, including bruising, numbness or tingling near the needling sites that may last a few days, and dizziness or fainting. Bruising is a common side effect of cupping. Unusual risks of acupuncture include spontaneous miscarriage, nerve damage and organ puncture, including lung puncture (pneumothorax). Infection is another possible risk, although the clinic uses sterile disposable needles and maintains a clean and safe environment. Burns and/or scarring are a potential risk of moxibustion and cupping. I understand that while this document describes the major risks of treatment, other side effects and risks may occur. The herbs and nutritional supplements (which are from plant, animal and mineral sources) that have been recommended are traditionally considered safe in the practice of Oriental Medicine, although some may be toxic in large doses. I understand that some herbs may be inappropriate during pregnancy. Some possible side effects of taking herbs are nausea, gas stomachache, vomiting, headache, diarrhea, rashes, hives, and tingling of the tongue. I will notify a clinical staff member who is caring for me if I am or become pregnant.

I do not expect the clinical staff to be able to anticipate and explain all possible risks and complications of treatment, and I wish to rely on the clinical staff to exercise judgment during the course of treatment which the clinical staff thinks at the time, based upon the facts then known is in my best interest. I understand that results are not guaranteed.

I understand the clinical and administrative staff may review my patient records and lab reports, but all my records will be kept confidential and will not be released without my written consent.

By voluntarily signing below, I show that I have read, or have had read to me, the above consent to treatment, have been told about the risks and benefits of acupuncture and other procedures, and have had an opportunity to ask questions. I intend this consent form to cover the entire course of treatment for my present condition and for any future condition(s) for which I seek treatment.

Glossary

- **Acupuncture:** is a safe and effective method of treatment. However, it can occasionally cause slight bleeding that usually resolves with pressing dry cotton on the spot where the skin is bleeding. It is also normal for the patient to have a temporary warm, tight, sore or tinging sensation at the acupuncture site
- **Acupressure/TuiNa** involves rubbing, kneading, pressing, and stroking, etc., which may result in muscle soreness at the massage site that can last several days. This technique may require disrobing. I understand all attempts will be made to assure my privacy
- **Indirect Moxibustion** requires burning an herbal material near the skin or on an acupuncture needle. Every precaution is taken to prevent skin contact, but the possibility of skin contact and mild burns exists.
- **Cupping** involves a localized suction produced by heating a small glass cup. There is a possibility that local bruising is likely to occur at the site where Gua Sha is performed
- **Tapping, Plum Blossom, Bleeding, Pricking** all involve multiple needle pricks at a localized site. Slight bleeding and/or bruising at the treatment site is likely occurrence. Only single-use needles are used in these procedures.
- **Electrical Stimulation/TENS** uses microcurrent electricity to stimulate acupuncture points. A mild tingling sensation of electricity will be felt
- **Treatment Using Control Points Ren 1/Du 1** In very rare cases, the Acupuncture provider may recommend treatment using acupuncture points near the genital organs. If this is necessary, the Acupuncture provider will notify me and will provide alternative treatments if I am uncomfortable with treatment using these points. I understand all attempts will be made to assure my privacy.
- Although we strive to provide services to as many people as possible, without prejudice, we reserve the right to refuse treatment to anyone. This includes but is not limited to those persons requesting services outside of the therapist's expertise or scope of practice
- Scheduled sessions must be canceled at least 24 hours prior to the appointment to avoid being charged for a full session. The charge is waived if the appointment is rescheduled to another time. True emergencies will be considered.
- I understand that payment is due at the time of service
